- **Recessed Lighting for Enhanced Visibility with No Obstruction of Work Space**
- **Large Ergonomically Designed Hand Holes for Operator Comfort**
- **Superior Air Flow for Dust Collection**
- **Compact Size for Minimal Bench Space**

## The ClearView WS6000 WorkStation

When using micro-abrasive blasting equipment, you know that a good workstation is essential to confine media dust for easy removal by the dust collector, as well as to provide an illuminated work area. Comco offers the ClearView model WS6000, a compact workstation that requires less bench space than standard workstations (16"W x 16"D x 14"H) and has features that make your job faster, easier, and more comfortable.

**Exceptional Comfort:** The ClearView has larger iris openings, set at an ergonomic angle and padded for optimum comfort. From shoulder to wrist, your arms and hands follow the natural alignment of your body, allowing you to work comfortably for longer periods of time with far less muscle fatigue.

**Superior Illumination:** The lighting of the work chamber is full and bright. You don't have to strain to see cavities in products, nor be distracted by shadows. The fluorescent light fixture is set high inside the workstation ceiling, out of your line of vision. There is never a bulb glare to accidentally catch your eye.

**Enhanced Dust Collection:** Air intakes are located across the bottom and top of the chamber, providing excellent dust collection.

**Accessibility:** The light switch is conveniently located on the side, within easy reach. Connections for intake hoses on both sides make the ClearView adaptable whether you are right-handed or left-handed.

**Easy View Option:** With Comco's MB4320 magnifier, you can see even the smallest parts with ease. The magnifier attaches directly to the outside of the workstation window with Velcro tape strips that make it easy to remove and reattach. It provides 2.4X magnification, with a wide lens and a wide field of focus, giving excellent visibility.

**Best of all, the ClearView costs the same as Comco's standard workstations.**

**So why delay? Call Comco today and enjoy enhanced micro-abrasive blasting tomorrow!**
