

EZ-Mix Hi™ Hand-Held Dispenser for two-part materials

- ◆ Electrically powered, motor driven
- ◆ Positive displacement technology
- ◆ Hand-held or bench-top use
- ◆ Pull trigger to dispense material
- ◆ Zero wastage of material
- ◆ Control the speed of dispense
- ◆ Low-to-High viscosity materials
- ◆ Choose the material best suited to your application
- ◆ Dispense material up to and including 1 Million cps
- ◆ Use different ratio's including 1:1 and 2:1
- ◆ Powered by external AC or DC power source
- ◆ Optional re-chargeable NiMH integral battery
- ◆ 50 ml capacity

The **EZ-MixHi™** from Dispensing Technologies Inc is an easy to use, electrically powered, hand held dispenser. Just pull the trigger to dispense materials with viscosities up to and including 1 Million cps. Release the trigger and the force to the pistons is cut **immediately** thereby eliminating any waste of material. Positive displacement techniques ensure dispensing accuracy, eliminate variability caused by air pressure build up or evacuate from a pneumatic cylinder. The **EZ-MixHi™** has a dial on the side that lets you control the dispense rate for greater

accuracy and more efficient operation. **Slow down** the rate when dispensing complex patterns, and **Speed up** the rate when you need to get the job done quickly. The **EZ-MixHi™**'s high torque motor allows you to work with high viscosity materials. It can use a variety of cartridges of varying ratio's including 1:1 , 2:1, 3:2 and 4:1.

The **EZ-MixHi™** is powered by its integrated re-chargeable battery so you can use it anywhere. It can also be powered from an AC or DC power source. The possible applications for the **EZ-MixHi™** are endless but it is ideally suited to: Aerospace, Automotive, Assembly, Dental, Industrial, and Medical applications.
