EPAK CUSTOM FOSSIL CLEANING & ABRASIVE BLAST CABINET

- **Huge Working Area**
- **Easy Access With 180° Hinged Door**
- **Easy Access Brushed Hand Opening**
- **Front & Back Illumination Of Parts**

Looking for a large custom sized abrasive blast cabinet for cleaning or preparing large fossils? Want one at a reasonable cost? Look no further.

With a large working area and easy access to the parts being blasted, our EWS2290 blast cabinet will give you enough room to work comfortably. With good visibility across the part through the top viewing window, the cabinet measures an impressive 1170mm wide x 360 high and 560mm deep, the cabinet can accommodate very large parts. Lighting at the front and back of the cabinet allows for good illumination of the part.

FEATURES AND BENEFITS

The front door can fully open by 180 degrees to allow easy access when placing a part in the chamber and the door is securely held closed by two large hinge clamps. Brushes along the front door allow easy access for hands anywhere along the length of the cabinet whilst working. Holes in both the top and sides allow for the use of a blaster from the right or left hand side.

Custom sizes available on request. Contact us for more information.
