

PAPER THERMOMETERS

Low Cost, Highly Accurate Temperature Control

Unexposed CON-TROL-CURE Paper Thermometers

CON-TROL-CURE Paper Thermometers after being exposed

Made of self-adhering plastic enclosed paper, **CON-TROL-CURE Paper Thermometers** are excellent heat indicators ideal for use within inaccessible curing systems, such as those found on many web and laminating presses.

Paper Thermometers are simple to use as they travel together with the product through the curing processor, and have proven accurate and flexible for most curing or drying processes.

To assist in determining how their UV inks react at varying temperatures, ink chemists have consistently relied on **Paper Thermometers** to provide them with cost-effective, highly accurate results.

Each strip has 5 temperature settings, and, once exposed to heat, will change color from white to black to indicate what temperature has been reached. Available 16 labels per set.

Product Specifications

- Plastic enclosed, self-adhering paper thermometers
- Highly accurate heat indicators (+/-1°C)
- *Manufactured to BS EN ISO 9001 guidelines*
- Heat sensitive calibrated coatings react within 1 second of heat exposure
- Distinct color change from white to black reveals temperature level
- Sets 1 and 2 have a 15 month shelf life, sets 3, 4, 5, 6, 7 and 8 have a 24 month shelf life
- Set includes sixteen 1cm by 5cm label strips, each strip offers 5 temperature settings
- Available in 8 temperature sets (*see below*)

Item No.	Description
M005-001	PAPER THERMOMETERS: Set #1 (100-130°F)
M005-002	PAPER THERMOMETERS: Set #2 (140-180°F)
M005-003	PAPER THERMOMETERS: Set #3 (190-230°F)
M005-004	PAPER THERMOMETERS: Set #4 (240-280°F)
M005-005	PAPER THERMOMETERS: Set #5 (290-330°F)
M005-006	PAPER THERMOMETERS: Set #6 (340-380°F)
M005-007	PAPER THERMOMETERS: Set #7 (390-435°F)
M005-008	PAPER THERMOMETERS: Set #8 (450-500°F)
